

ALL-N-ONE SECURITY MODULE

PRODUCT BRIEF

HACKERS AND THIEVES ARE AT YOUR DOOR. IS YOUR SECURITY SOLUTION TOUGH ENOUGH TO STOP THEM BEFORE THEY DESTROY YOUR NETWORK?

You should call Global DataGuard. We're the only company with the All-n-One Security Module—a completely integrated, easily affordable and simple to deploy security solution designed from the ground up for small to medium-sized businesses just like yours.

The All-n-One Security Module makes available to you the same industry-proven, enterprise-class software and hardware that multi-national corporations spend significant portions of their IT budget on. So you get all of the benefits without the huge price tag!

With a multitude of fully integrated applications in one trouble-free turnkey system, the All-n-One Security Module is, hands-down, your best choice for cost-effective, premium security features to meet your company's business needs.

PREDICT AND PROTECT

Global DataGuard's All-n-One Security Module (ASM) for Enterprise Unified Threat Management (UTM) has everything you need to solve your current and future network security needs, with up to a 70% reduction in ownership costs over traditional UTM solutions or stand-alone products.

Unlike other UTM products on the market today, the All-n-One Security Module is a complete, centrally managed system that can be offered with managed services or as a stand-alone suite. And because it uses an underlying, adaptable architecture to fully integrate up to twelve industry-proven features, you don't waste valuable time trying to connect the dots between different security products and platforms.

THE ALL-N-ONE SECURITY MODULE. EVERYTHING YOU NEED – AT A PRICE THAT'S DESIGNED TO FIT YOUR BUDGET.

- Vulnerability scanning
- Firewall
- Content filtering, anti-virus and anti-SPAM
- Secure site-to-site connectivity
- Remote access
- Optimized network traffic flow
- Intrusion detection and prevention systems
- Patented network behavioral analysis and correlation
- Security event management
- Network access management and monitoring
- Fully compliant with PCI, SOX, HIPAA and NERC CIP
- 24/7 managed security services

In fact, the All-n-One Security Module has all of the advanced tools you need to keep your network secure, including including firewall, content filtering, antivirus and anti-SPAM protection; a virtual private network for secure site-to-site connectivity and remote access; IP reputation for optimized network traffic flow; intrusion detection and prevention systems; patented network behavioral analysis (NBA) and correlation capabilities; vulnerability scanning; a security event manager for global, network and vendor threats and detected vulnerabilities; network access management and monitoring; plus 24/7 managed security services.

What does all that mean? It means that your security worries are over because now you can afford a simple, turnkey system that provides:

- Early warnings of security threats that other products cannot see;
- The ability to prevent and block threats before they harm your network;
- An easy-to-use, instant view of prioritized security threats and the underlying data that created them;
- The ability to supplement your IT staffing requirements – whatever they may be – with 24/7 managed security services; and
- Unparalleled price/performance in an easy to use solution that's designed specifically for your business environment.

ALL-N-ONE SECURITY MODULE— THE GLOBAL DATAGUARD ADVANTAGE

Scalable

With mix-and-match applications and four models to choose from, you can easily add security features when you need to, and grow your security solution along with your network.

Flexible

The ASM can work alongside your existing security products so your IT investment is protected.

Manageable

The ASM gives you immediate, centralized access to prioritized security threats, plus 24/7 managed security services designed to meet your specific IT staffing requirements.

Cost Effective

With up to a 70% reduction in ownership costs over other UTM or stand-alone solutions, the ASM is clearly the most cost-effective and easy-to-use solution for your current and future security needs.

AVAILABLE ASM MODULES

Model: N-2500-S

- 10/100/1000Mb
- On Premise Appliance
- 1U Rackmount Form Factor
- Core 2 Duo Processor

Model: N-2501-S

- 10Mb
- On Premise Appliance
- 1U Rackmount Form Factor
- Dual Dual-Core Xeon® Processors

Model: N-2510-S

- 100Mb
- On premise appliance
- 1U Rackmount Form Factor
- Dual Dual-Core Xeon® Processors

Model: N-2520-S

- 1000Mb
- On premise appliance
- 1U Rackmount Form Factor
- Dual Dual-Core Xeon® Processors

Optional License Enabled Upgrades

- Network Behavioral Analysis (NBA) license
- Vulnerability Scanner Module (VSM) license
- Threat Management (SDM) license (requires VSM)
- Network Access Management (NSZ) license (requires NBA)

THE STANDARD FOR SMALL TO MEDIUM BUSINESS SECURITY

With the All-n-One Security Module, you can predict, prevent and block threats that would otherwise severely impact your network and your business. The ASM system's ability to continuously adapt and respond to changing threats within your network environment gives you substantially better service and far greater protection than traditional UTM solutions or stand-alone products. The ASM solution is the only UTM product on the market today that has these uniquely integrated, industry proven features in one centrally managed system that is easy to use and affordable to own.

FLEXIBLE MANAGED SERVICES FOR YOUR IT STAFFING NEEDS

The choice is yours. Whether you need a little help or a lot, our Managed Security Services can be customized to fit your individual IT staffing needs. We can provide you with immediate turnkey access to the ASM solution with no contract required, or you can purchase, install and manage your ASM product on your own.

Either way, we can economically and flexibly augment your company's IT security staff with 24x7 managed security services – whether it's for off-hours, holidays or customized timeframes based on your peak management requirements. With or without a contract, our SRM Managed Security Services can provide you with real-time visibility, control and oversight of your entire security environment. And it can help your IT budget go the distance through significant cost savings in capital expenditures, training and staffing.

GLOBAL DATAGUARD – MAKING COMPLIANCE SIMPLE

Now that your network security solution is up and running, you may be asking yourself, "is my network compliant with industry regulations?" With the All-n-One Security Module, you can be confident that it is. At Global DataGuard, we understand that compliance depends on a number of critical factors. From auditing to technology, process and policy, we know that your organization has unique compliance requirements. That's why we take a holistic approach to compliance – from PCI and SOX to HIPAA and NERC CIP – tailoring our services to your company's current needs. Rest assured that Global DataGuard, a certified PCI vendor, can provide the partnership required to help you efficiently achieve and maintain ongoing regulatory compliance.
